We have two domains in our subnet.

We recently created and added new domain.

However, the newly added domain PCs were failed to scan with the following errors.

Already added the scanning credentials and credential mapping but still failed.

Errors found while scanning:

UPTIME	**The object invoked has disconnected from its clients. (Exception from HRESULT: 0x80010108 (RPC_E_DISCONNECTED))**
ANTIVIRUS	**Access is denied. (Exception from HRESULT: 0x80070005 (E_ACCESSDENIED))**
SERVICES	**The object invoked has disconnected from its clients. (Exception from HRESULT: 0x80010108 (RPC_E_DISCONNECTED))**
HARDDISK	**The object invoked has disconnected from its clients. (Exception from HRESULT: 0x80010108 (RPC_E_DISCONNECTED))**
NETWORK	**The object invoked has disconnected from its clients. (Exception from HRESULT: 0x80010108 (RPC_E_DISCONNECTED))**
SHARES	**Object reference not set to an instance of an object.**

OS	**The object invoked has disconnected from its clients. (Exception from HRESULT: 0x80010108 (RPC_E_DISCONNECTED))**
